PROJECTS

Live: <https://movieapp206.netlify.app/>

Movie Explorer

A responsive React application for discovering and exploring movies across genres.

Features:

- Dynamic genre filtering
- Detailed movie information display (title, image, genres, year, duration, description)
- Responsive design for all device types
- Intuitive user interface for easy browsing

Tech Stack:

- React | CSS | JavaScript | Axios | API

Key Highlights:

- Implemented dynamic genre filtering functionality
- Designed responsive and visually appealing movie cards
- Integrated Advance Movie API for comprehensive movie data
- Ensured cross-device compatibility with responsive design

A solo project developed to showcase React skills and API integration.

ACHIEVEMENTS

- Charity Work, Successful Team Collaborations

HOBBIES

- Coding, Travelling, Language Learning
